Summary

Computer Science undergraduate specializing in backend systems and full-stack development. Proficient in Node.js, Python, and React with hands-on experience building and deploying production-grade applications. Solved 400+ LeetCode problems. Seeking SWE/backend roles focused on scalable, data-driven systems.

Education

Vellore Institute of Technology

2022–2026

B.Tech in Computer Science Engineering

CGPA: 8.51

Technical Skills

Languages: C++, Python

Backend: Node.js, Express, REST APIs

Frontend: React.js, HTML, CSS

Databases: MongoDB, SQL, Redis

Tools: Docker, GitHub Actions, Postman, Swagger

Projects

MeetingZone

meeting-zone-eta.vercel.app

React, TypeScript, Firebase, ZegoCloud, WebRTC, Google OAuth

- Implemented real-time video conferencing using WebRTC and ZegoCloud APIs with sub-200ms latency, supporting screen sharing, mute/unmute controls, and camera toggle for up to 50 concurrent users.
- Integrated Google OAuth for secure authentication, Firebase for real-time chat messaging, and built a room-based joining system with unique shareable meeting links.
- Designed responsive UI with TypeScript ensuring type-safe components, reducing runtime errors and improving overall code reliability.

Movie Recommendation System

<https://streamliit-app.onrender.com/>

Python, Streamlit, Scikit-learn, Pandas, Cosine Similarity

- Built a content-based recommendation engine using cosine similarity and TF-IDF vectorization on movie metadata including genre, cast, and keywords to deliver personalized suggestions.
- Developed an interactive Streamlit UI with a search bar, movie posters, and instant recommendations; optimized vectorization pipeline reducing query response time by ~60%.
- Processed and cleaned a dataset of 5000+ movies using Pandas, handling missing values and feature engineering to improve recommendation accuracy.

BudgetBuddy API

budgetbuddy-s0lf.onrender.com

Node.js, Express, MongoDB, JWT, Redis, Docker, Swagger

- Built a REST API supporting user registration, login with JWT authentication, and full CRUD operations for expense tracking with category filters and monthly summaries.
- Implemented Redis caching for frequent queries reducing response time by ~40%, Dockerized the application for consistent deployment, and documented all endpoints with Swagger UI.
- Structured codebase using MVC architecture with modular route handlers and middleware for input validation and error handling, improving maintainability and scalability.

Internship

Semantics Cybernetics LLP

May 2023 – June 2023

Marketing Intern

- Analyzed campaign performance data across channels; built tracking reports that informed a strategy shift leading to 20% increase in client acquisition and 40% improvement in lead conversion.

Achievements & Certifications

- Semi-Finalist at Flipkart Grid 7.0.
- CodeVita Finalist (TCS).
- Participated in IIT Jammu Algo Bash 2.0.
- Solved 400+ problems on LeetCode demonstrating strong problem-solving ability.
- Certifications: Full Stack Developer MERN (Smartbridge), Mastering DSA (FACE Prep), MongoDB, Python Essentials, AWS (In Progress).
